Projects

Freight Booking site

A Project on providing truck booking and organising services to users via online websites. Developed using Express.js framework, MongoDB as the Database implementing user/login concepts.

Todo Applicaton, This basic Todo application allows users to input tasks, click the "Add Task" button, and see the tasks listed on the page. You can enhance this application by adding features such as marking tasks as completed, deleting tasks, or persisting tasks using local storage. Customize it based on your skills and the requirements of the position you're applying for.
